DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "an armored vest worn by an occupant" renders claim 1 and 7, indefinite as a claim may not positively recite a person or rely on such for definition. It is suggested applicant state a "vest adapted to be worn" for clarity. The phrase "the vehicle seat" lacks proper antecedent basis in claims 1 and 7.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyce et al. Boyce et al shows the use of an armored vest (12) having a front and back plate (12a, 12b). The front plate is supported by the back plate through a load transferring mechanism (48,49) attached between upper sections of the front and back plates and a ledge (see Figs. 4 and 5) of the back plate. The back plate has attachment mechanisms (22) to attach to the rear of an occupant's seat. Boyce et al shows the use of an extended section (the downward convex section shown in

Figure 3) of the front plate and an extended section (14) of the back plate for resting on the vehicle seat. Bocye et al. further discloses the use of vehicle attachment points, as shown in Figure 6.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference No 3,179,360, 3,827,716, 4,299,406, and 4,923,147 show features of the claimed invention.
